👤 CAREER PROFILE

Hi, i am Pablo, a 23 years old student in computer engineering. I am looking at the moment for a part time contract (2/3 days a week). Do not hesitate to contact me by any means (mail, linkedin, phone). You can download this resume here

💼 EXPERIENCES

Software developer
Quantcube Technology

October 2017 - April 2018

Data mining/Crawling. (Python) , begin learn setup Hadoop ecosytem. (HDFS, Kakfka, Amazon EC2, Amazon S3), Realtime Visualization Platform (HTML, CSS, JS, Python Flask, Web Sockets, Google Maps API), Task automatisation. (Unix, Python), Data architecture. (HDFS, MySQL), Smart Data Algorithm (Python pandas, numpy, matplotlib)

Software developer intern
Quantcube Technology

January 2017 - July 2017

Extracting and managing data (Python - Scrapy, MySQL, Selenium, CRONTAB), Infrastructure (Amazon S3), Prepare data for machine learning (Python - NLTK - ScikitLearn)

🎓 EDUCATION

Computer Science (Architect in numeric technology)
School 42 in Paris

2015 - 2018

42 is a brand new school opened in 2013 by Xavier Niel. Its purpose is to give 1000 thousands student a year a formation in computer science. Is is very general, we study lots of domains : Unix universe, algorithms, graphics, web development, App development, low level code, cryptography, network, sysadmin

Double Licence Mathematics & Computer science.
Paris Diderot (Paris 7)

2014 - 2015

Second year of license in Mathematics & computer engineering.

Preparatory class for Engineer school (PCSI)
Jacques Decour (75009)

2013 - 2014

Intensive Preparatory call for engineer school. We studied mainly Mathematics, Physics, Chemistry engineer science and computer science.

📋 PROJECTS

Here are some projects i currently work or worked on.

My badminton club website - A responsive website designed to replace our older blogger platform. I maintain it technically and am one of the current publishers.

42 projects - The largest part of my project are on github, some being private, so if you want to see them don't hesitate to ask me.

🚀 SKILLS & PROFICIENCY

Python (Flask, Scrapy, Selenium, data science libs)

Database (MySQL, MongoDB)

Web (HTML, CSS, JS, NodeJS, PHP)

Functionnal Programming (OCAML)

Object Oriented Programming

Swift (IOS)
